
DIGITAL LIBRARY MANAGEMENT SYSTEM

PRESENTED BY :

ASISH KUMAR MISHRA

PRIYADARSHI PRIYARANJAN SAHOO

PARAMJYOTI BHOI

INTRODUCTION

- This project implements a digital library system.
- It aims to make the use of library user friendly and easier.
- It aims to reduce the time consumed for finding book and the workload of the library employees.

ABSTRACT

- It has provisions for
 1. User to search and preview books
 2. Know availability of books
 3. Search for a book
 4. View their records

HARDWARE AND SOFTWARE SPECIFICATIONS

➤ Software used

1. Operating system : Windows 10
2. Database : MySQL
3. Programming Language : Python

HARDWARE USED

1. Processor : Intel core i3
2. Memory size : 8 GB of RAM
3. Input : Mouse/Keyboard

SYSTEM STUDY

EXISTING SYSTEM

- Any information regarding book, its availability or ranking has to be recorder at the library.
- User have to browse the library manually to find a book with required content.
- In short the existing system has a lot of disadvantages.
- Limited knowledge.
- There is no record of books in PDF format.
- No implementation of GUI.
- Less interaction.

SYSTEM PROPOSED

The application can search for all the books by title, author and know if it is available or not .

This aims to overcome drawbacks of existing system and:

- Reduce time and effort to find books and members.
- Make the use of library user friendly and efficient.
- Improve efficiency and quality of service.

➤ This Application allows different features :

1. Book Details
2. Member Details
3. Transactions
4. Reports

BOOK DETAILS

- Add book
- Edit book
- Delete book
- Search book

MEMBER DETAILS

- Add Member
- Edit Member
- Delete Member
- Search Member

TRANSACTIONS

- Issue book
- Return book

REPORT

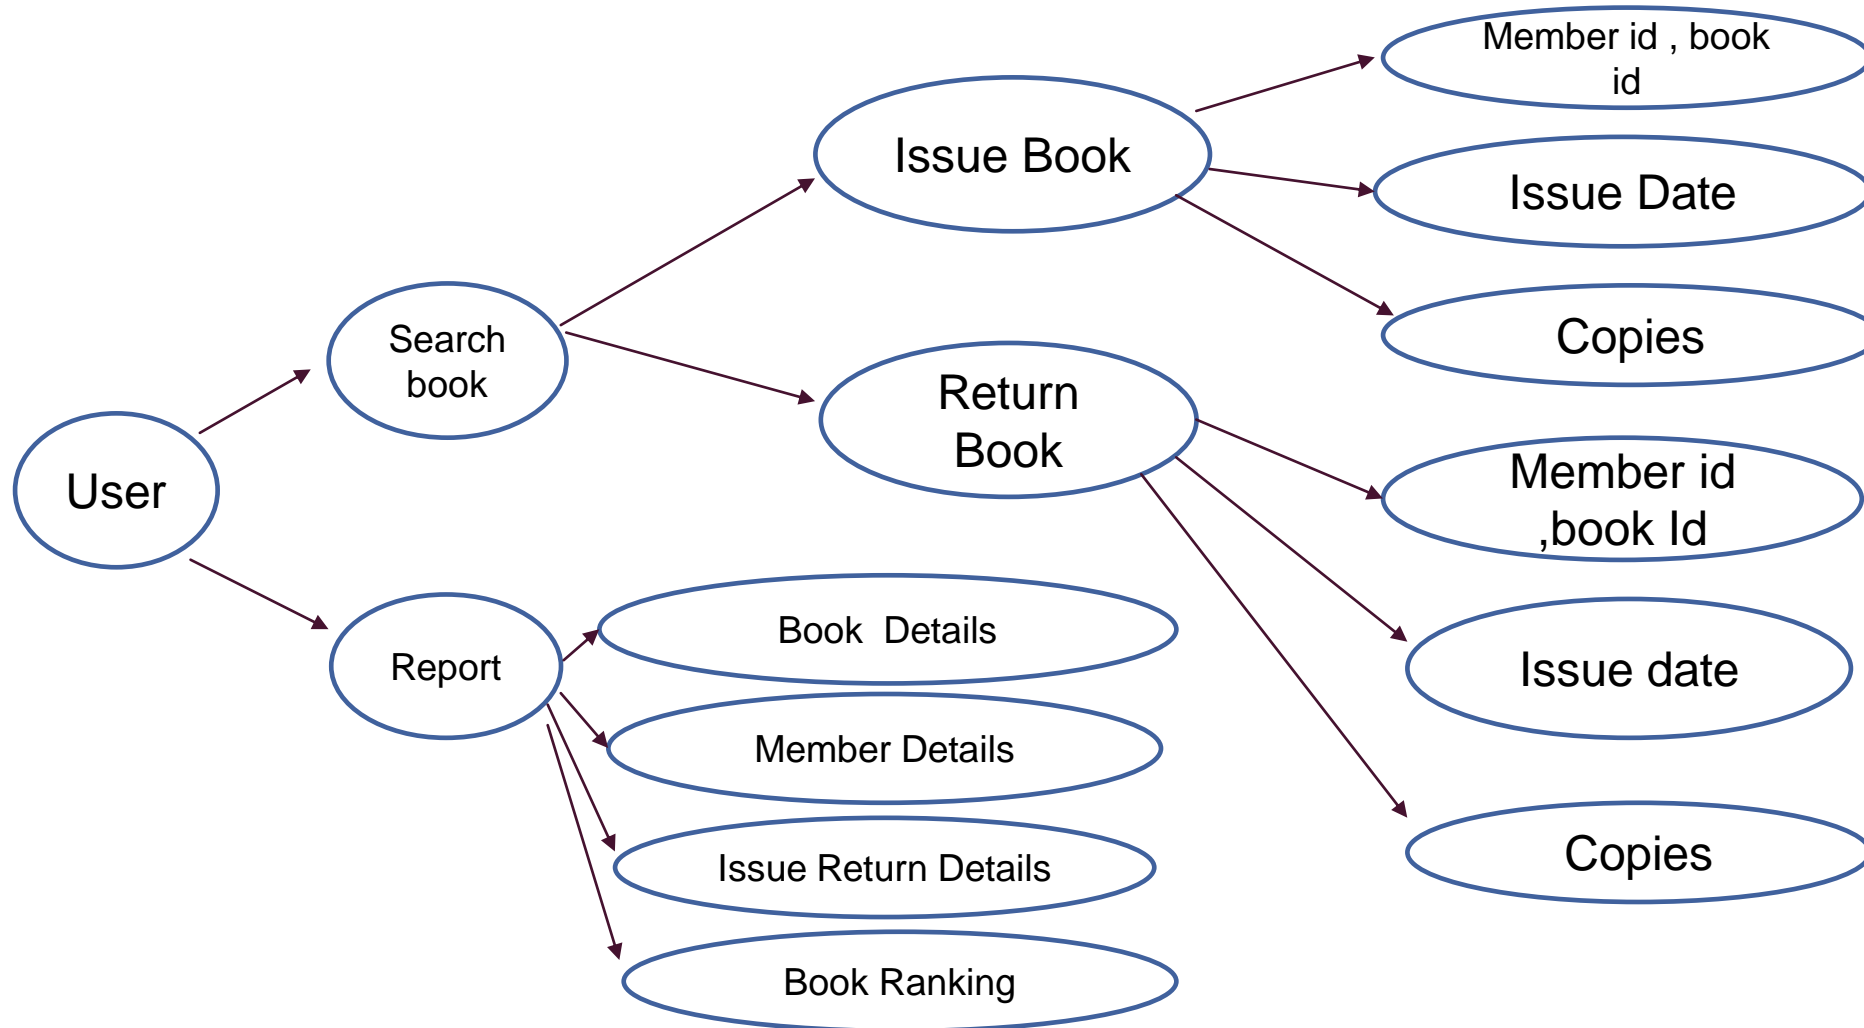

- Show list of books
- Show list of members
- Book chart

TABLE DESIGN

TABLES

- There are 4 tables used.

Book

| | |
|-----------------|---------|
| bookId | int |
| bookName | varchar |
| authorName | varchar |
| bookPrice | float |
| copies | Int |
| remainingCopies | int |

■ Issue

| | |
|-----------|------|
| issuelId | int |
| issueDate | date |
| mamberId | int |
| bookId | int |
| copies | int |

■ members

| | |
|---------------|---------|
| memberId | int |
| memberName | varchar |
| memberAddress | varchar |
| phNo | char |

■ Returns

| | |
|------------|------|
| returnId | int |
| returnDate | date |
| memberId | int |
| bookId | int |
| copies | int |

FUTURE USE

- This application could be modified and developed for future use.
- In the future this application can be extended to include processes like book reservation, how much time it will take for available a issued book, user authentication and member authentication .
- This software will be more reliable and user friendly by the help GUI technology.

CONCLUSION

- This project has been successfully completed and tested .
- In the long term , this project make the use of library more efficient , user friendly, easier and effective.
- It is a real improvement over the exciting manual system as it effectively overcome all the drawbacks of the existing system.

THANK YOU
